DOMINANT SKILLS

- Pentesting (Web/AD)
- Malware Analysis
- Binary Exploitation
- API Security Auditing
- Wireless Vulnerabilities
- Python / Bash / C / x86

METHODOLOGIES

- OWASP Top 10 / ASVS
- MITRE ATTACK
- NIST Framework
- PTES Standard
- Zero Trust Architecture

SECURITY STACK

- Burp Suite Professional
- Metasploit Framework
- Ghidra / IDA Pro
- BloodHound / SharpHound
- Nmap / Wireshark
- Hashcat / Aircrack-ng

LANGUAGES

- English (Professional)
- Tamil (Native)

AWARDS

- SIH 2025 Finalist
- Yukthi CTF 2025 Finalist

DHAKSHAN A

Penetration Tester

PROFESSIONAL SUMMARY

Offensive security specialist with over 6 years of experience in pentesting and vulnerability research. Proven track record of discovering critical IDOR and logic flaws in enterprise environments. Expert in Active Directory attack paths and binary reverse engineering.

CORE EXPERIENCE

Independent Security Researcher & Bug Hunter 2022 – Present
HackerOne / Bugcrowd / Private

- Discovered Critical IDOR leading to full account takeover (CVSS 9.8).
- Chained Kerberoasting and NTLM Relay with BloodHound for AD compromise.
- Performed 60+ assessments on global platforms focusing on API & logic.

Full-Stack Developer 2022 – Present
Personal Projects

- Architected and deployed responsive user interfaces using modern frameworks, ensuring seamless cross-platform compatibility for desktop applications.
- Developed robust backend logic and RESTful APIs using Python, focusing on secure data handling and efficient server-side processing.
- Integrated security-first principles into the development lifecycle, utilizing automated scripts for tool integration and vulnerability mitigation.

System Administration & Networking 2022 – Present
Self-Directed / Labs / School Labs

- Harden Win/Linux (Debian, Server 2022), managing GPOs and updates.
- Design secure VLANs, firewalls, and VPNs for encrypted access.
- Monitor logs via automated scripts to ensure 99.9% uptime

TECHNICAL PROJECTS 2019 – Present

- **Python:** Automated scripts, tool integration, and backend logic.
- **Networking:** Secure protocols and architecture design.
- **Cybersecurity:** Pentesting and vulnerability assessments.
- **SIEM:** Log analysis and real-time threat detection.

EDUCATION

B.Sc. Computer Science (Cyber Security) - CGPA(8.3) 2025 – Present
Sri Ramakrishna College of Arts & Science (SRCAS)

12th Standard | Senior Secondary Education - 73% 2024 – 2025
Chinmaya Vidyalaya CBSE Senior Secondary School

10th Standard | Secondary Education - 80% 2022 – 2023
Chinmaya Vidyalaya CBSE Senior Secondary School
